3+ years of professional experience with **JavaScript**, **HTML**, and **CSS**.

Regularly work with frameworks and libraries such as **Node.js**, **React**, **Express**, **Next.js**, **HTMX**, and **TailwindCSS**.

Proficient in **responsive web design**, **front-end development**, and **webserver deployment**.

Experienced with **Golang**, **SQL**, **Nginx**, and **some Rust and Python**.

Skilled in development tools, including **Git**, **GitHub**, **Vim**, and **Docker**.

## WORK EXPERIENCE

### Principal Web Developer

April 2023 — Present

Get After It LLC

Aurora, NE

As the principal web developer, I learned to translate business requirements into code while collaborating with individuals of varying technical literacy. I also honed my communication skills, particularly in asking the right questions to fully understand project requirements and deliver impactful solutions.

#### Highlights

- Independently transitioned the company's entire record-keeping system from paper to a fully digital solution.
- Translated complex business requirements into efficient, scalable, and flexible code.

### Freelance Web Developer

February 2022 — December 2024

McSites.net

Manhattan, KS

As a freelance web developer and designer, I built multiple performance-focused websites and set up reliable email services for clients. Through this experience, I learned to manage my time effectively, pace myself for projects, and work independently to meet deadlines and client expectations.

#### Highlights

- Designed and built websites from the ground up.
- Designed, implemented, and deployed web servers.
- Hosted, managed, and ensured the reliability of email services through regular maintenance and troubleshooting.

## PROJECTS

### CRM Frontend

Built an entire CRM frontend from the ground up for a large commercial driving academy, seamlessly adapting the system to meet constantly evolving business requirements.

### Class Enrollment Software

Developed custom class enrollment software for a large commercial driving academy, featuring a fully integrated email and SMS communication system along with a billing system.

### Workout Timer Solution

Developed software with continuous integration and set up hardware for a boxing gym workout timer featuring a touchscreen display that adjusts to workout durations, gaining insights into optimizing low-resource devices.

## ABOUT

I specialize in front-end development, with experience in back-end as well. I focus on creating both client-facing websites and internal tools. I strongly value clear communication and requirements. I work efficiently in the terminal, using tools like Vim and Tmux to keep my workflow streamlined. In my freetime I explore tech related stuff that I post on my site [404notboring.com](https://404notboring.com).
